Career Objective

Computer Science student and DEPI trainee with skills in Python, SQL, and ETL processes. Seeking a Data Engineering opportunity to apply data processing and pipeline development skills while contributing to efficient, reliable, and scalable data solutions.

EDUCATION

Faculty of Computer Science - IT Department

Mansoura University | 2024 - 2028

Overall Grade: Very Good (B+)

EXPERIENCE

Data Engineering Trainee

Digital Egypt Pioneers Initiative (DEPI)

Aug 2026- Dec 2026

- Developed ETL and data-processing pipelines using Python and SQL, transforming raw data into structured, analysis-ready datasets.
 - Managed and organized relational databases using SQL, improving data accessibility and supporting analytics workflows.
 - Built scalable data solutions using Microsoft Azure, strengthening cloud-based data engineering and deployment capabilities.
 - Applied data engineering concepts to hands-on projects, developing Python/SQL workflows aligned with analytics, AI, and business-intelligence requirements
 - Transformed raw datasets into structured outputs through Python, SQL, and ETL workflows, preparing data for downstream analytics and decision-making.
-

COURSES

Problem Solving Trainee

ACPC Community - Tanta

Jan 2024 - May 2024

- Introduction to C++
 - Data structure and Algorithms
 - Covered basics of problem solving and programming
-

SKILLS

- | | | |
|-------------------|--------------------------|--------------------|
| • Python | • Planning skills | • Active Listening |
| • C++ | • Decision-making | • Time Management |
| • SQL | • Efficient Multitasking | |
| • Problem Solving | • Team Work | |
